

CatVerse

Product Roadmap

April 2023- Early Access Release

iOS app Early Access Release

- MetaCat creation preview - Scan your cat's face or body to create a digital copy of your cat as a MetaCat.
- MetaCat personality preview - define your MetaCat's personality and see how it shapes the conversation.
- Have open-ended conversations with your MetaCat about anything!
- CatSync preview - synchronize your MetaCat with your real cat's personality by just talking with your real cat through the app.

May 2023

Conversation History

View, replay and download memorable moments and key conversations.

Social Media (SNS) Sharing

Share your MetaCat conversations with friends and family on your Social Media platform of choice.

June 2023

Mackerel-tabby fur pattern support

You can scan cats with mackerel-tabby coat patterns to generate 3D MetaCats.

Japanese and Korean language support

UI, user speech recognition, and MetaCat voice response support in Japanese and Korean.

Android App Release

Released to the Play store, the Android version of the app will have feature parity with the iOS version.

July 2023

Additional Language support

UI, user speech recognition, and MetaCat voice response support in French, German, Spanish, Portuguese, Thai and Indonesian.

Classic tabby and color-point fur pattern support

You can scan cats with classic tabby and color-point (e.g. Siamese, Ragdoll) fur patterns to generate 3D MetaCats.

CatRooms

Enjoy entertaining conversations between MetaCats as they talk with each other using generative AI in chatrooms for MetaCats.

August 2023

CatSync with full facial expression and body language detection

Synchronize your MetaCat with your real cat faster and better with full support for detecting cat facial expressions and body language.

Keep your MetaCats forever in the blockchain

You can keep your MetaCats forever on blockchains such as Ripple's XRPL.

September 2023

CuriousCat

Your MetaCat will grow and develop it's personality by asking you questions about their origins and their day.

MetaCat Memories

MetaCats will use the full history of their conversations to answer questions and respond to situations.

White spotting color pattern cat support

You can scan cats with white spotting (e.g. tuxedo) coat patterns to generate 3D MetaCats.

Fur quality advancement

You will see more realistic and detailed fur on your MetaCats.

Q4/2023

MetaCats and metaverses

You can export your MetaCats into other metaverses.

CatSync+

Enabled to distinguish your cats by voice and facial recognition, use CatSync with all your cats simultaneously.

MetaCat Voices

Apply different human voices to your MetaCat to match their personality, gender and age.

Ticked-tabby, tortoiseshell and calico fur pattern support

Scan cats with ticked-tabby, tortoiseshell and calico fur patterns to generate 3D MetaCats

2024

MetaCat Assistant

While running on a dedicated device, your MetaCat listens and responds to his or her name and able to perform seemingly any task.
